INGA PLATI

ICT Applications Development Student | Seeking Work Integrated Learning (WIL) Placement

Woodstock, Cape Town | 063 726 9926 | 230126634@mycput.ac.za |www.linkedin.com/in/iplati |github: IngaPlati (Inga Plati)

PROFESSIONAL SUMMARY

Final-year Diploma in ICT: Applications Development student at Cape Peninsula University of Technology (graduating 2026), with hands-on experience across the full development stack: Java, JavaScript, HTML/CSS, SQL, and PHP. Built and deployed client-server applications, relational database systems, and UI/UX-tested web interfaces through academic and group projects. Strong foundation in software development, database design, and system usability. Reliable, fast learning, and comfortable working independently or in a team. Seeking a Work Integrated Learning (WIL) placement to apply technical skills in a real-world development environment and contribute to impactful IT solutions.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, HTML, CSS, SQL, PHP

Tools & Frameworks: MySQL Workbench, NetBeans, VS Code, Git/GitHub, Figma, IntelliJ

Concepts: Client-server architecture, database design (ERD/normalization), UI/UX design, wireframing, usability testing, sockets/network programming

Operating Systems: Windows, Linux

EDUCATION

Diploma in ICT: Applications Development *2024 – Present*

Cape Peninsula University of Technology, Cape Town

National Senior Certificate (NSC) *2022*

Desmond Mpilo Tutu High School

PROJECTS

Student Enrolment System *Nov 2025*

Java, Apache Derby, Swing, Sockets

- Developed a client-server enrolment application with a Java Swing GUI and an Apache Derby database backend.
- Implemented real-time client-server communication using Java sockets, including modules for student registration and course allocation.
- Designed an interactive GUI that improved user interaction and overall system usability.

Bolt App Redesign (Group Project) *Mar – Nov 2025*

Figma, UI/UX, Wireframing

- Redesigned a ride-hailing mobile app interface in Figma, applying core UI/UX design principles.
- Produced wireframes and interactive prototypes, then conducted usability testing to validate design decisions.
- Improved navigation flow and visual hierarchy, resulting in a more intuitive user experience.

E-Commerce Database System (Group Project) *Feb – Nov 2025*

HTML, CSS, JavaScript, PHP, MySQL

- Collaborated in a team of developers to build a full-stack online thrift store web application.
- Designed a normalized relational database using Entity-Relationship (ER) modeling to ensure data integrity and performance.
- Built responsive, server-side functionality with PHP, including product management and checkout workflows.
- Applied UI/UX and system design principles to improve site usability and navigation.

WORK EXPERIENCE

Sales Associate (Seasonal) *Nov 2024 – Dec 2025*

The Fix (TFG), Wellington

- Monitored inventory and supported stock control processes using store management systems.
- Maintained accurate, real-time product tracking to support store operations.
- Supported visual merchandising and day-to-day store operations in a fast-paced retail environment.
- Demonstrated consistent reliability, time management, and efficiency under pressure.
